

Name: _____

Mrs. Swiski, 6th Grade Career Readiness & Info Technology

WHEN I GROW UP...

Even if you haven't given too much thought to careers, you have probably been asked what you want to be when you grow up. You might have even been asked this question many times. Your answer might have been the same or changed each time you were asked! For this activity, use the space below to write the first thing you remember wanting to be. Have you changed your mind or added other job ideas since then, or do you still want to be the same thing? If you have changed your mind, what is the new career?

Now that you have started thinking about careers,
what do you do next?

You will be taking a career interest survey to kick start your thoughts about what direction you would like to head with future career plans.

6th Grade Career Readiness & Information Technology

Dear Students,

Welcome to my class!

I will be teaching you about Career Readiness and Information Technology.

After we (Teachers and Administrators) figure out exactly how we will be teaching you while you are at home, I am hopeful we will be doing most of the work in Google Classroom using various Google Applications (like Google Docs, Slides, and Sheets). Until then, you will be given worksheets.

Here is a brief outline of what we hope to cover this last quarter:

New Pennsylvania Department of Education (PDE) standards require all students to be provided a curriculum that encompasses the following four strands:

1. Career Awareness and Preparation
2. Career Acquisition
3. Career Retention and Advancement
4. Entrepreneurship

We will be covering a series of lessons to help students find their interests, understand what is involved in finding a job, understanding work habits and working with others, creating cover letters and resumes, and understanding entrepreneurship. This work will be collected and kept in folders as required by the PDE.

Information Technology curriculum will include students becoming familiar with the following applications:

- Google Classroom
- Google Docs
- Google Sheets
- Google Slides
- Google Drawings

Please feel free to email me at any time: hswiski@bbsd.org.

I will be sending out an invite to you (through your school gmail account) to join my Google Classroom where I will post information and my weekly schedule for "office hours," should anyone need to chat with me live.

Sincerely,

Mrs. Swiski
