Macy the Elephant

by ReadWorks

Macy and her parents are elephants that live in the jungle. They roam around the plants and trees all day, every day, looking for food. Macy's favorite food is bananas. She is always looking for banana plants. When she finds one, she uses her trunk to pick a lot of bananas.

Usually, it gets really hot in the jungle. One day, the sun is very strong, and the temperature is very high. Macy and her mom and dad use their big ears to cool themselves off. They flap their ears back and forth, trying to push away the heat. But it isn't enough—they are still too hot.

The family of elephants walks around to look for a way to cool down. Macy sees a group of orangutans lazily lying on the branches of a big tree. They don't even move as the elephants walk past, too hot to do anything. A family of parrots flies by, but all Macy sees is a blur of red, green, and blue.

The colorful birds land on a branch nearby, and Macy admires their bright feathers. Then, all of a sudden, Macy spots a loris sleeping on the tree that sits right next to the parrots. Macy gets excited-she never sees loris because they are only awake at night. The small elephant stops to look at the small animal. It looks like a little monkey, only fluffier with a tiny, round face and big, black eyes. Macy is about to take a step closer when her mom and dad pull her along with their strong trunks, not wanting to wait any longer to cool down.

Finally, the three elephants find a big pool of water. They run into it and splash the cool water on each other. Macy feels so much better. She lies down and rolls around. She covers her body in mud. Elephants love to take mud baths. It cools their skin and protects them from bug bites. They all play in the water for a while, and other elephants come to enjoy the mud, too.

Then Macy and her parents step out of the water and decide to go and find food. Macy spots a banana plant in the distance. She runs toward the bright yellow fruit. She grabs a bunch with her trunk and munches on the soft bananas. It's been a good day for Macy-bananas and a mud bath. What more could she ask for?

Adding 3-Digit Numbers

Find $237 + 186$.

Step 1: Add the ones. $7 \text{ ones} + 6 \text{ ones} = 13 \text{ ones}$

Regroup. $13 \text{ ones} = 1 \text{ ten}, 3 \text{ ones}$

Step 2: Add the tens. $1 \text{ ten} + 3 \text{ tens} + 8 \text{ tens} = 12 \text{ tens}$

Regroup. $12 \text{ tens} = 1 \text{ hundred}, 2 \text{ tens}$

Step 3: Add the hundreds.

$1 \text{ hundred} + 2 \text{ hundreds} + 1 \text{ hundred} = 4 \text{ hundreds}$

Add together the hundreds, tens, and ones.

$$400 + 20 + 3 = 423$$

Estimate by rounding to the nearest hundred. Then find each sum.

Subtracting Across Zero

To subtract from a number with 0 in the tens place, you need to regroup one hundred into 10 tens.

Find $207 - 98$.

Step 1

Subtract the ones. Since there are 0 tens, you must first regroup the hundreds.

$$\begin{array}{r} 207 \\ - 98 \\ \hline \end{array}$$

Step 2

Regroup the hundreds.

2 hundreds and 0 tens =
1 hundred and 10 tens.

$$\begin{array}{r} 110 \\ 207 \\ - 98 \\ \hline \end{array}$$

Step 3

Regroup the tens.

10 tens and 7 ones = 9 tens
and 17 ones.

Subtract.

$$\begin{array}{r} 9 \\ 11017 \\ 207 \\ - 98 \\ \hline 109 \end{array}$$

Is your answer correct? Check by adding: $109 + 98 = 207$.

Find each difference.

1. $\begin{array}{r} 301 \\ - 72 \\ \hline \end{array}$

2. $\begin{array}{r} 205 \\ - 36 \\ \hline \end{array}$

3. $\begin{array}{r} 400 \\ - 228 \\ \hline \end{array}$
