

# Character Traits

FOLLOW ★ DIRECTIONS

A character's traits tell us how the character looks on the outside as well as what he or she is like on the inside. They help us better understand the character.

## Outside Traits

Outside traits are physical traits. They tell us what characters look like, such as their hair color, height, eye color, and clothing.

## Inside Traits

Inside traits describe what a character is like on the inside. For example, a character may be lazy, kind, or funny. To find out what characters are like on the inside, look at what they say, do, think, and feel.
